Italian Crystal Growth 2020

crystal growth: from theory to application

The aim of Italian Crystal Growth 2020 is to promote the meeting of researchers coming from public centers and industries to discuss problems related to the nucleation and growth of crystalline materials in natural, laboratory and industry environments. The Conference is open to subjects working in both experimental and theoretical fields concerning the crystal growth.

Topics / scientific sessions:

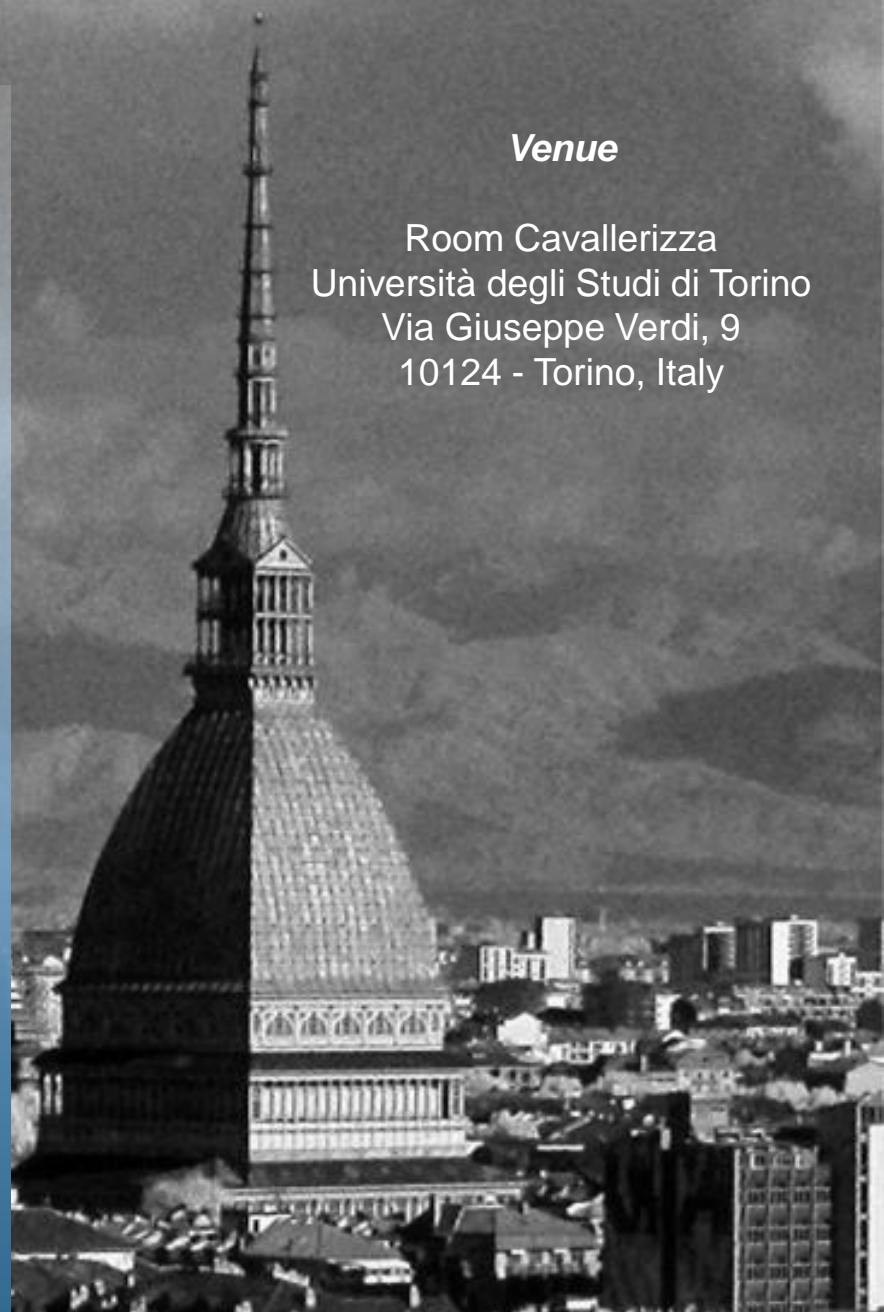

- Fundamentals of nucleation and crystal growth: theory, modeling and experiments
- Epitaxy of inorganic materials: fundamentals and applications
- Organic based materials
- Crystallization for the industry
- Crystal growth in biology
- Crystal growth for environment and health

Venue

Room Cavallerizza
Università degli Studi di Torino
Via Giuseppe Verdi, 9
10124 - Torino, Italy

Scientific Committee

Prof. Giovanni Battista **De Giudici** (*Università di Cagliari*)
Dr. Simona **Fermani** (*Università di Bologna*)
Dr. Paola **Prete** (*CNR, Lecce*)
Prof. Silvia **Rizzato** (*Università degli Studi di Milano Statale*)
Prof. Adele **Sassella** (*Università di Milano-Bicocca*)
Dr. Andrea **Zappettini** (*CNR, Parma*)

Organizing Committee

Dr. Linda **Pastero** (*Università degli Studi di Torino*)
Prof. Marco **Bruno** (*Università degli Studi di Torino*)
